Groundwater in the area of Stony Hill Road may be contaminated with trichloroethylene (TCE). The U. S. Environmental Protection Agency (EPA) plans to gather more information by collecting groundwater samples from residential wells in neighborhoods on or near Stony Hill Road.

SITE HISTORY

The North Carolina Department of Environment and Natural Resources (NCDENR) recently notified EPA that TCE contamination was discovered in residential wells near Stony Hill Road in Wake Forest, NC. EPA is currently in the area to assess the potential of exposure to the residents by sampling residences with drinking water wells.

ACTIONS TAKEN OR PLANNED

In order to determine the potential for exposure, EPA would like to conduct drinking water well sampling in the area surrounding Stony Hill Road. Upon receipt of sampling results EPA will determine future actions, which may include additional sampling events or the installation of water filtration units on properties with concentrations of TCE above the Removal Management Level (RML).

PERMISSION NEEDED FOR SAMPLES

If you live in the area described above, EPA would like your permission to take water samples from your well. An access agreement form is included with this fact sheet for your convenience. Please fill out the access agreement and contact Kenneth Rhame to arrange for sampling. The samples are taken outside and you do not have to be present unless requested and it is at **no cost to you**.

You may contact Kenneth Rhame for additional information at (919) 475-7397.
